This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

INTRODUCTION

THIS edition of the General Catalogue of Non-Graduates of Williams College, prepared at the direction of the Trustees, is the first of its kind to be published at Williams. No extensive list of non-graduates has been compiled previously, although in the 1880 and 1885 issues of the General Catalogue, at the end of each class, the names of the non-graduates followed the record of the graduates, separated from it by a line.

The class lists of the annual catalogues furnish the nucleus of this edition. Every effort has been made to collect data verifiable from official sources, and for this purpose catalogues of other colleges, student society catalogues, fraternity catalogues, alumni class reports, biographical and genealogical encyclopaedias, and army records have been thoroughly searched — this in addition to repeated letters sent to all living non-graduates whose addresses are known. In fact all available sources of information have been examined and the results carefully verified. Yet the editor is conscious that the result at best is incomplete.

The arrangement and plan is similar to the 1910 edition of the General Catalogue of Graduates. The abbreviations should require no explanation. The names of ordained ministers are printed in italics. The dates of the resident years are entered immediately after the name, followed by a semicolon. Dates with omitted figures are frequently due to the fact that men came to College after the catalogue was printed and did not stay until the next one appeared. Degrees of other colleges follow, arranged in

206894

chronological order. The academic record including graduate-study and positions held in colleges, in the army, in the navy, and in civil and diplomatic service is then set forth. Membership of learned societies, as far as ascertained, is given.

The names of non-graduates who have received honorary degrees from the College are not included here but are inserted in the General Catalogue of Graduates. A name which appears in the annual catalogues in more than one class is recorded with the original list. In a few cases in which a name reappears after an interval, without sufficient identity, it has been repeated to avoid possible omissions.

Thanks are due to the alumni, private individuals and to academic and civil officials everywhere for their courteous responses to requests for information. Particular thanks are due to the members of the Library staff for their assistance in the clerical labor involved in compilation. The chief obligation of the editor, however, is to the zeal and interest of William T. R. Marvin, L. H. D., Class of 1854, whose wide acquaintance with Williams alumni has made him a source of information, suggestion and material help, which it is a pleasure to acknowledge.

This catalogue aims to present in brief form the academic record of all non-graduates, but as most of the data here contained have been brought together for the first time from printed and manuscript records, many of which are conflicting, errors are unavoidable. Corrections or additions to these entries are cordially requested. These should be sent to the College Library.
